# EcoFood

*I am Protected*

Fruits, Vegies, Meat, Fish, Nuts, Grains

Instructions Manual

Designed and tested  
California, U.S.A.

**Congratulations!** Your new friend EcoFood will now keep you and your family protected from germs and pesticide residues by purifying your food using hydroxyl ions.

We use aviation titanium alloy to perform electrolytic process that produces hydroxyl ions.

**Important Safety Notes:**

- **Keep the charging base away from water. Only the device itself is waterproof.**
- **Only supplied charging base must be used to charge your device.**
- **EcoFood device uses lithium-ion battery and must be kept away from fire, heat and all other dangerous environments.**
- **Proper disposal must be used for this product as of lithium battery.**
- **Do not use the product if any part is damaged.**
- **Please make sure nothing gets inside the product. If any small object gets inside, please remove it before use.**

**What's Included:**

EcoFood Device

Charging Stand

USB – Type C wire

Manual

**How to Use:**

You can use your EcoFood device to purify fruits, vegetables, meat, fish, nuts, and grains.

EcoFood is used in water together with any of the above foods for 10-15 minutes depending on quantity and/or volume of products purified. Stirring every few minutes will amplify the process. Leaving your food in the purified water for additional 10-15 minutes after the cycle will also increase the purification.

1. Inspect for damages and Fully charge your device before use.
  - Press the power button and lay in water horizontally together with any of the specified foods above. Please purify different kinds of food separately. You can purify fruits and vegetables together, but please don't purify meat and/or fish together with fruits and veggies.
  - Recommended amount of water not to exceed 3 liters (100 oz.)
  - Recommended water temperature not higher than 40°C (104°F)
2. Run for 10-15 minutes depending on the amount of food being purified and stir occasionally for best purification.
3. Leave your food for another 10-15 minutes in this hydroxyl ion rich water after the cycle for best results.
4. Dry the device thoroughly and store away from reach of children.

## **Specifications:**

Model Name: EcoFood

Charging: Type C 5V – 2A

Power Rating: 8W

Technology: Hydroxyl Ions

Recommended amount of water not to exceed 3 liters (100 oz.)

Recommended water temperature not higher than 40°C (104°F)

Bacteria & Virus Effectiveness >99.9%

Pesticides Residues Removal Efficiency >99.9%

Warranty: 1-year
