Stepless dimming touch:

1.stepless dimming is 0-100% color temperature /
brightness free gradient.

2.Press and hold the color temperature/brightness
function key to determine the percentage of color
temperature/brightness of the phototherapy lamp
according to the length of time you press the touch
switch. When you press and hold the switch, the light
will change in time. You can use the naked eye to feel
what brightness is most suitable for the loose.

3.Continued use after power off will memorize the
brightness used last time.
